

Subject: Grant of extension on submission deadline, regarding the tender «for the procurement of one (1) crawler hydraulic excavator two (2) wheeled articulated loaders»

Request for extension:

1. "With this document we request the change of the closing date for the submission of offers of the launched tender from 27/12/2023 to 22/01/2024. The main reason is the difficulty of preparing and completing our offer as we approach the Christmas and New Year holidays where factories in Europe are underperforming or remain closed."
2. "Regarding your Tender with No. TED 098/2023 for the Supply of one (1) Crawler Hydraulic Excavator and two (2) Wheeled Articulated Loaders in which we would like to tender our company, we would like to request you to extend the deadline for submission of tenders at least until and on 15.01.2024. The reason for submitting our request lies in the fact that we will have to get in touch with the supplier company which we must inform about the supply in question, so that in cooperation with them we can look for technical information that is not included in the available our technical means and arrange the best possible discount, for your organization, on the price of the machines we intend to offer. Due to the holiday season and as you understand, this type of communication requires more time than usual."
